

Concerning this matter. I urge the FCC not to approve, mandate or otherwise support any such things as a "Broadcast Flag". Please support the American people's right to fair use. As it stands now there is no such restriction on our capabilities and it should remain that way even into the new "Digital" age. The makers of the TV hardware, and producers of content do not need any such protection. Please keep TV free to the American public as it stands now, where anyone can record anything for later enjoyment in thier own home. Please reference the findings in the Sony Time shifting case as a precedent.
